- Stevens, Michael 11:05 AM
- Johnson, Debra 11:30 AM

## Built for the Way You Practice

Eyefinity EHR is a cloud-based electronic health record solution that enhances your patients' experience, cuts exam and documentation time, and adapts to the way you practice.

## Enhanced Patient Engagement

Enjoy more face-to-face time with patients, not the computer screen, when you use the iPad® app during an exam.

## Adaptive Technology for a "Custom Fit"

Eyefinity EHR adapts to the unique way each doctor in your office likes to perform an exam. With exam protocols, each doctor's exams are populated with preferred procedures and produce consistent documentation.

## Safely Collect Patient Data

With kiosk, patients can check in using a designated iPad and fill in their own medical and family history. Eliminate double entry and be paperless, while staying HIPAA compliant.

## Easy Compliance

Succeed with our MIPS performance evaluation, built-in registry, and IRIS for ophthalmology practices.

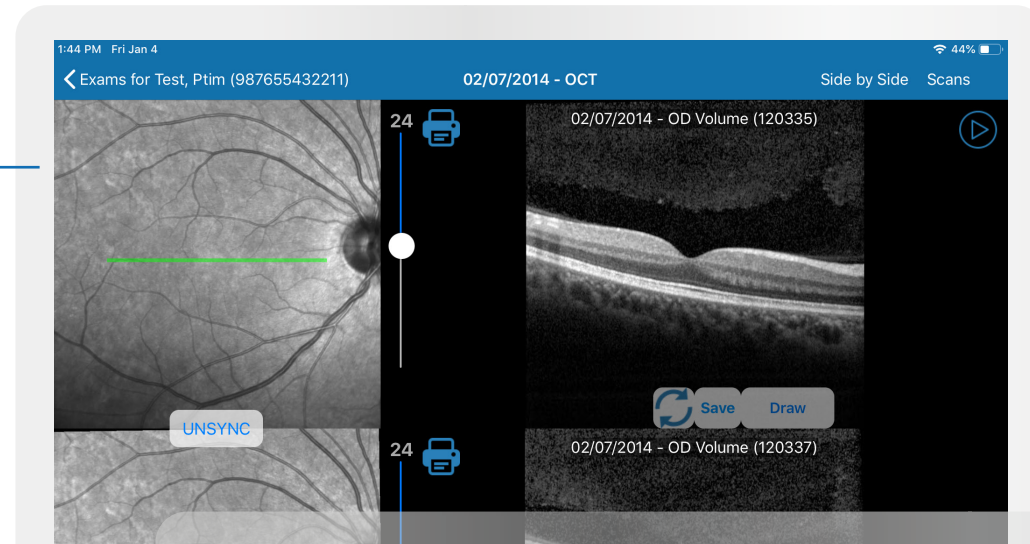

### Experience the Complete Eyefinity Cloud Platform

Eyefinity EHR integrates with OfficeMate®, Eyefinity Practice Management, and AcuityLogic™, allowing you to customize a solution to fit your specific needs.

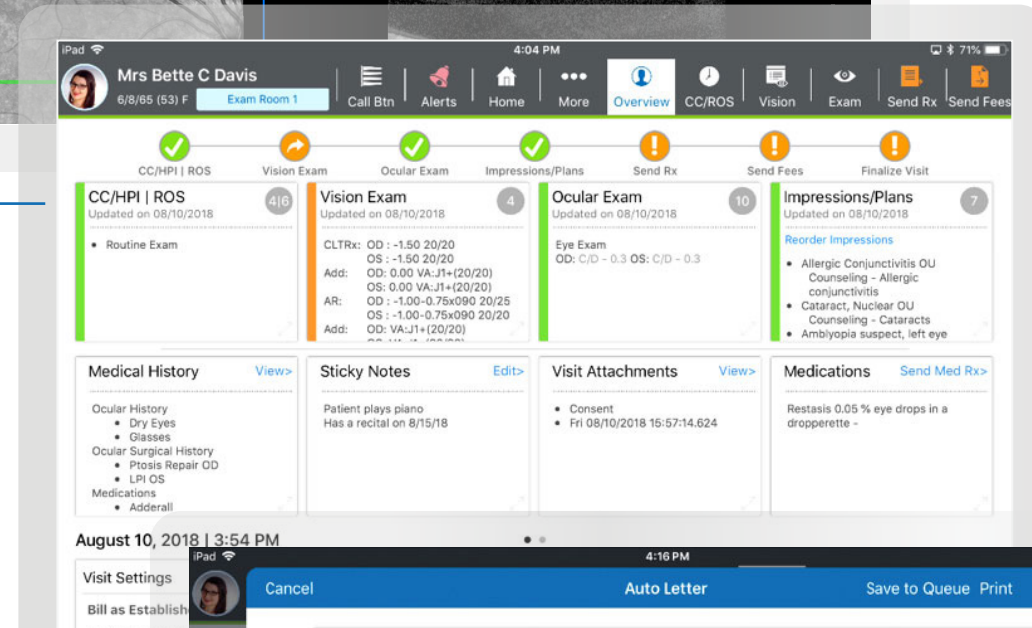

## Image Management

Review, save, compare, and annotate images from any diagnostic equipment directly within the patient's chart.

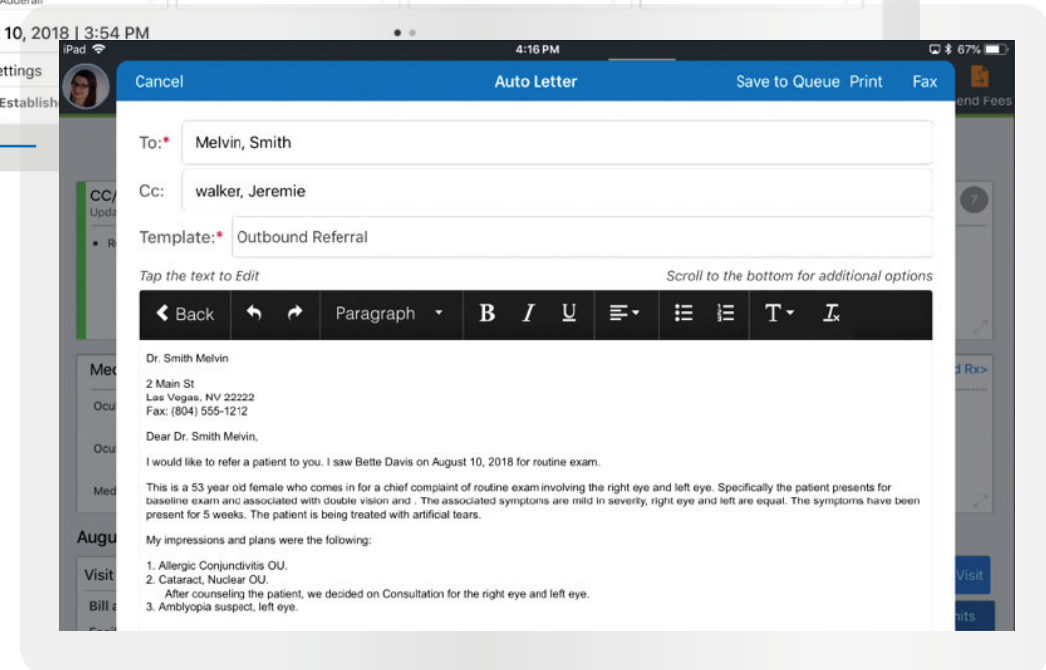

## Visit Overview Progress Bar

See exam progress, including what your technician has completed, and immediately identify missing steps that might affect billing.

## e-Fax

Eliminate wasted staff time and build medical referrals through instant communications with primary care and referring physicians.

## Additional features

- MIPS ready
- Meaningful use certified
- Easy access and entry of patient demographic information
- Inventory, barcode printing, and scanning

# LEARN MORE

## System Requirements

System requirements are routinely reviewed and updated as technology advances. Visit [www.eyefinity.com/EyefinityEHR](http://www.eyefinity.com/EyefinityEHR), and click on System Requirements for the latest information.
