Primary Open-Angle Glaucoma (POAG): Reduction of Intraocular Pressure (IOP) by 15% or Documentation of a Plan of Care

In this chapter:
- Reporting Methods, 1
- Denominator, 1
- Numerator, 2
- ExamWRITER Instructions, 3

Percentage of patients aged 18 years and older with a diagnosis of primary open-angle glaucoma (POAG) whose glaucoma treatment has not failed (the most recent IOP was reduced by at least 15% from the preintervention level) or if the most recent IOP was not reduced by at least 15% from the preintervention level, a plan of care was documented within the 12-month performance period. This is an outcome measure.

This measure is to be reported a minimum of once per performance period for glaucoma patients seen during the performance reporting. It is anticipated that eligible clinicians who provide the primary management of patients with POAG will submit this measure.

**Reporting Methods**
- Claims

**Denominator**
Patients 18 years of age or older on date of encounter;
AND who had a diagnosis of POAG:

Primary Open-Angle Glaucoma (POAG): Reduction of Intraocular Pressure (IOP) by 15% or Documentation of a Plan of Care

AND who had a visit during the measurement period:

92002, 92004, 92012, 92014, 99201, 99202, 99204, 99205, 99212, 99213, 99214, 99215, 99307, 99308, 99309, 99310, 99324, 99325, 99326, 99327, 99328, 99334, 99335, 99336, 99337

Denominator Exclusions

Telehealth modifier:

GQ, GT 95, POS 02

Numerator

Patients whose glaucoma treatment has not failed (the most recent IOP was reduced by at least 15% from the preintervention level) or if the most recent IOP was not reduced by at least 15% from the preintervention level, a plan of care was documented within 12 months.

Performance Met

Intraocular pressure (IOP) reduced by a value of greater than or equal to 15% from the preintervention level:

3284F

OR

Glaucoma plan of care documented:

0517F

AND intraocular pressure (IOP) reduced by a value less than 15% from the preintervention level:

3285F

Performance Not Met

IOP measurement not documented, reason not otherwise specified:

3284F with 8P

OR

Glaucoma plan of care not documented, reason not otherwise specified:

0517F with 8P

AND intraocular pressure (IOP) reduced by a value less than 15% from the pre-intervention level:

3285F
Document IOP reduction or plan of care:

1. In a patient’s exam record in ExamWRITER, record the office visit.
2. Click the Surgery - Plan - Mgmt tab.
3. Click the Impressions/Assessment category bar.
5. In the Impression/Glaucoma window, select one of the following options:
   - IOP Reduction is > 15% - 3284F
   - < 15% - 3285F and Glaucoma Plan of Care Documented - 0517F
6. Click Process.
Primary Open-Angle Glaucoma (POAG): Reduction of Intraocular Pressure (IOP) by 15% or Documentation of a Plan of Care
